WORK EXPERIENCE

Senior Application Developer Nationwide Insurance

05/2019 - Present

Achievements/Tasks

- Currently migrating the mobile application from being an Ionic-Angular application to a Flutter Application.
- One of two designated lead for a 4-month outsourced project (Accenture) to bring in new features to Nationwide mobile Financial users. Pushed for simple and scalable solutions (like creating api's to build native features versus pushing the current struts web application into a mobile web-view) and implemented complex solutions like displaying a unique landing page for Financial only mobile users.
- Created bash shell scripts that spun up Kubernetes pods with one docker container for each of our automated test scenarios in our python automation project, to run the tests in parallel. It would ultimately log back the failing tests' names and their output.
- Developed Agile & Scrum principles to manage our team's workflow.

Software Engineer Associate New York State Chief Technology Office

11/2018 - 05/2019

Achievements/Tasks

- Worked on a request tracking/management application for our Integrated Eligibility System mobile app, using Angular6 on the front end, Java Spring Boot Framework for the back end and MongoDB for the database. Site can search through client requests based on different fields and has a live feed to see any new requests live. The live feed was implemented using MongoDB Change Streams.
- Worked on two Windows Services (C#, .Net Core) for a NYS vendor portal. The Windows service is used to validate, and update excel files against an SQL server. Currently have reduced validation times by implementing SQL stored procedures reducing the processing of a file with 500,000+ rows from 4.5 hours to 15 minutes.

Software Engineer Intern New York State Chief Technology Office

07/2018 - 11/2018

Achievements/Tasks

- Worked on a Java Application that detects changes on a Lightweight Directory Access Protocol currently hosted on an Oracle Directory Server and writes them over to its future host a Red Hat Linux Server. Will need to scale to support over 500,000+ transactions an hour across 18 million NYS accounts.

Linux Admin Student Intern Office of Information Technology Services

09/2017 - 07/2018

Achievements/Tasks

- Migrated SUSE Linux Servers to Red Hat Linux Servers (created scripts to streamline process from one server every 3 hours to one server every 30 minutes).

TECHNICAL SKILLS

Javascript

Typescript

Flutter

Java

Linux

Kubernetes

NodeJS

NoSQL/SQL

EDUCATION

Mathematics

University at Albany, State
University of New York

05/2019

3.4

Courses

- Dean's List
- Fall 2016 through Spring 2019

SIDE PROJECTS

www.legeitstudio.store
(04/2020 - 05/2020)

- E-commerce site with unlimited product upload for store owners

LANGUAGES

English

Native or Bilingual Proficiency

Spanish

Professional Working Proficiency

TEACHING EXPERIENCE

Calculus (Pre-calc, Calc I, Calc II)

University at Albany, State
University of New York

Tasks/Achievements

- Achieved a 100% tutee-passing rate for calculus and statistics classes.
- Explained complex concepts simple terms allowing tutees to better participate and understand their coursework.
